

PROTECTIVE DIVIDER AND ENCLOSURE DISC ASSEMBLY FOR LASER DISCS AND LASER DISC DRIVES.

ABSTRACT OF THE DISCLOSURE

A substantially circular disc is disclosed for insertion between laser discs outside of a laser disc drive. The disc prevents surface scratching of laser discs. The disc is placed between laser discs outside of a case and between laser discs in laser disc cases, spindle containers, storage files and carrying cases. This invention further includes a laser disc enclosure for protecting both sides of a laser disc inside and outside a laser disc drive.
